

# Set up your Pack station

**Purpose:** Purpose of this document is to help launch managers / launch POCs / Seller POCs, smoothly setup their pack station.

**Audience for doc:** Launch Managers / Launch Operations executives / Seller POCs.

**Overview:** This document list down all the steps which you need to follow to setup your pack station.

## Hardware Requirements:

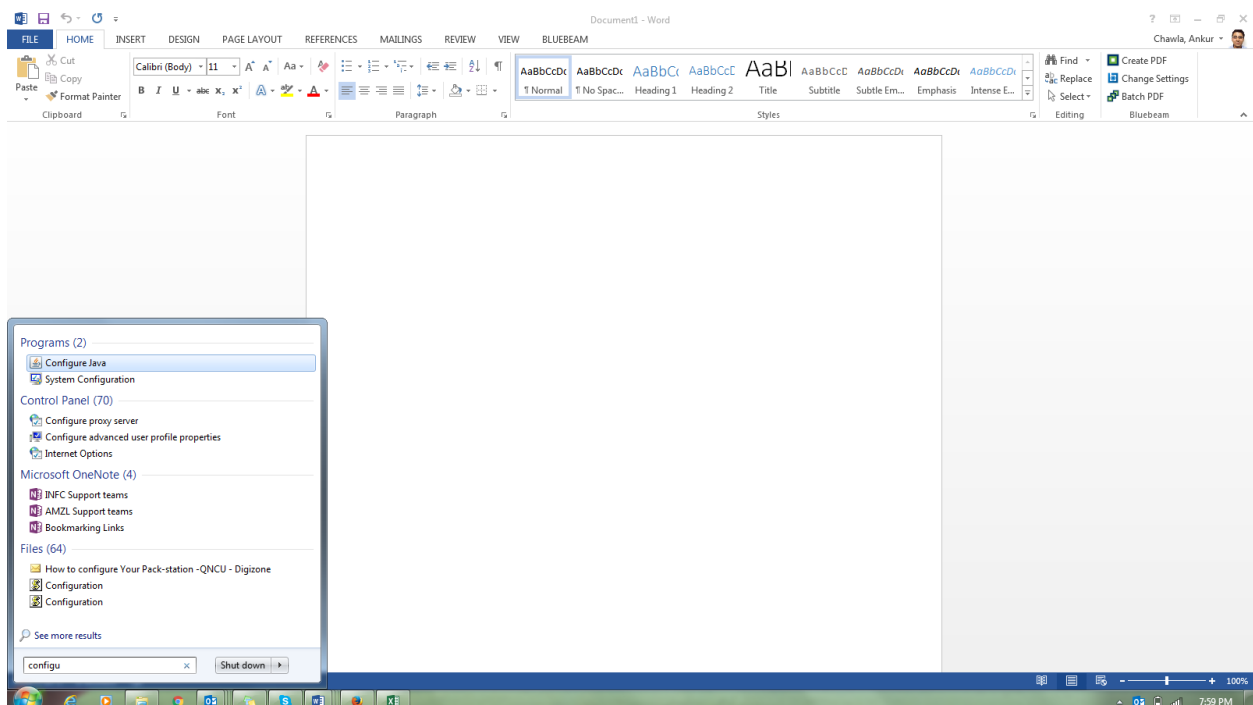

- a) Gx430t Printer for shipping label
- b) GC420t Printer for gift card print
- c) Pdf printer for packing slip (invoice) & pick task

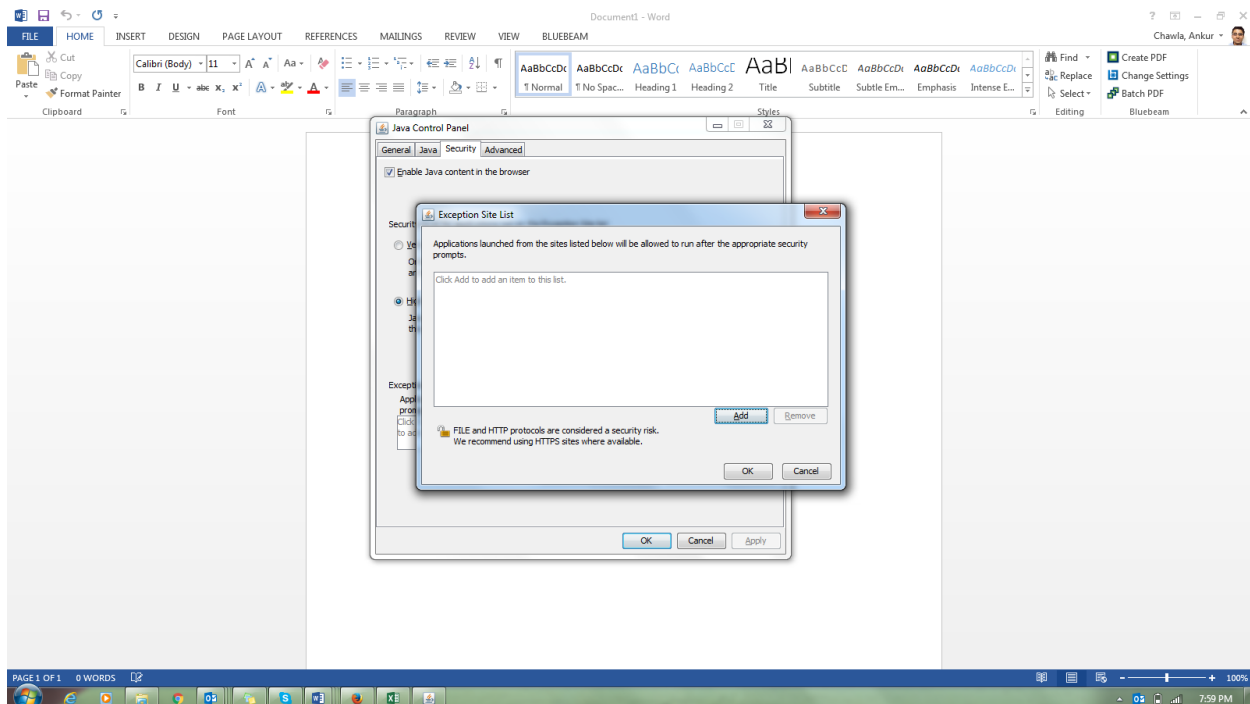

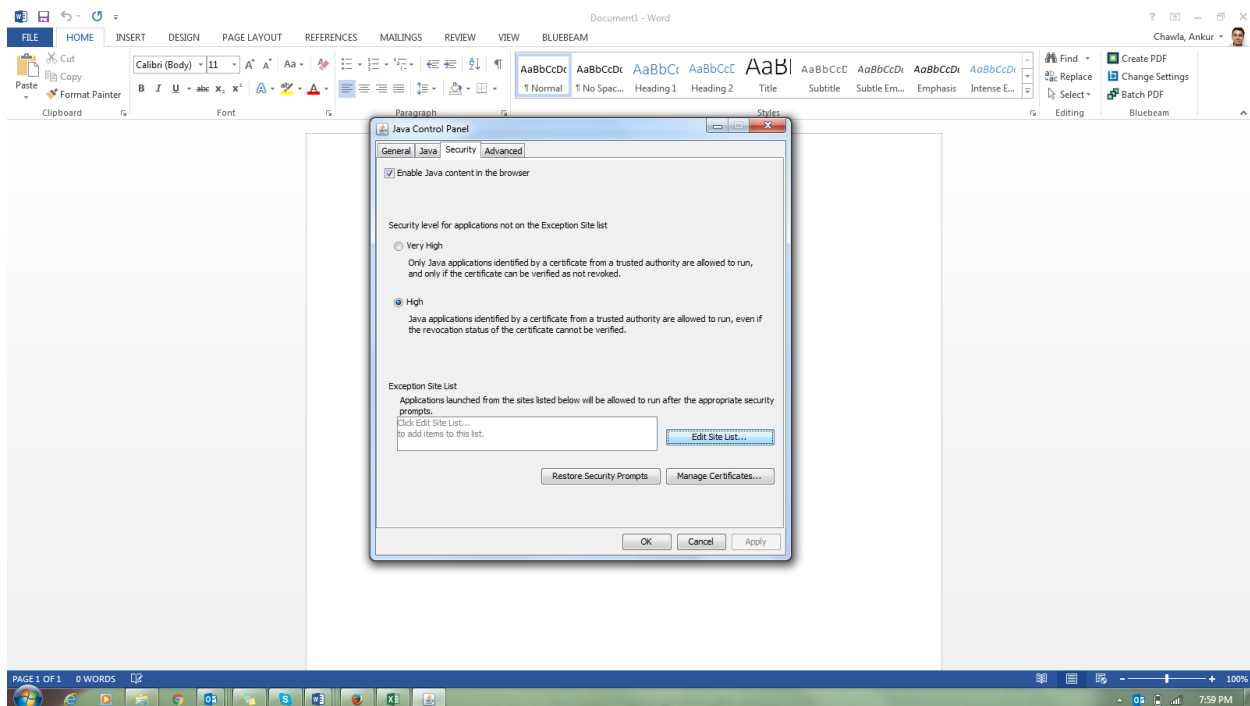

## Software Requirements:

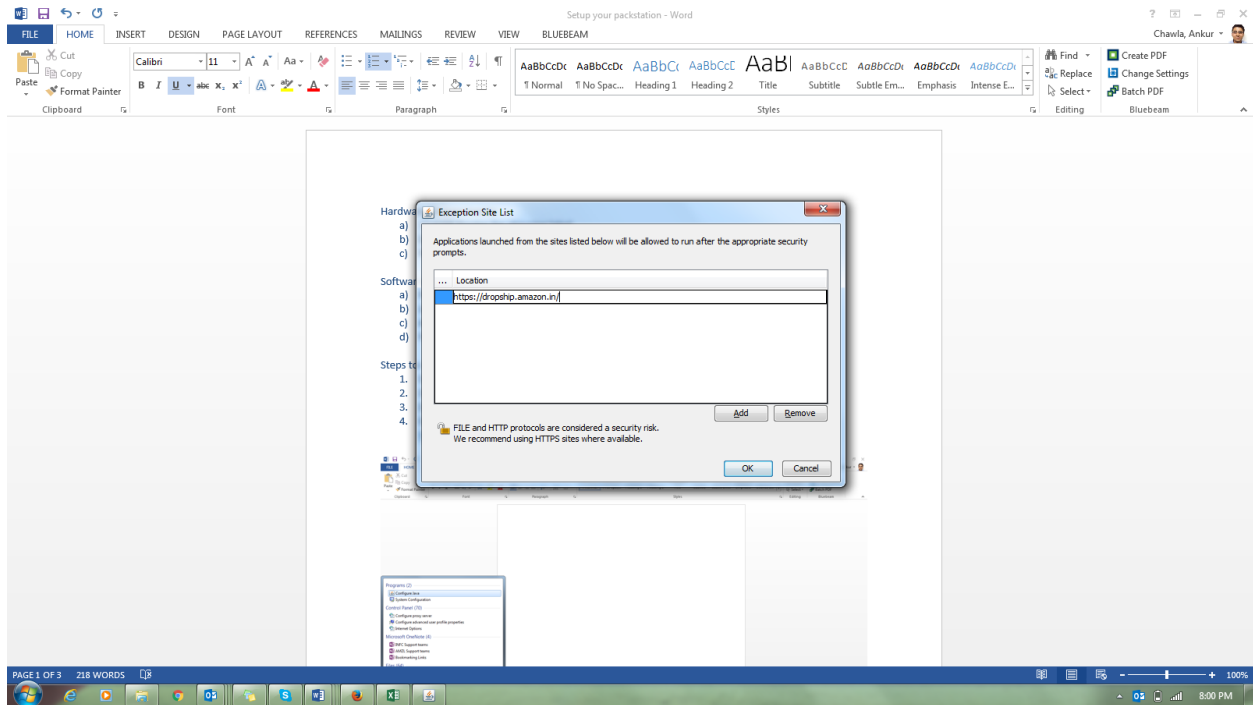

- a) Printer drivers – CD obtained with printers.
- b) Java version 8.0
- c) Adobe reader
- d) Firefox

## Steps to configure your pack-station:

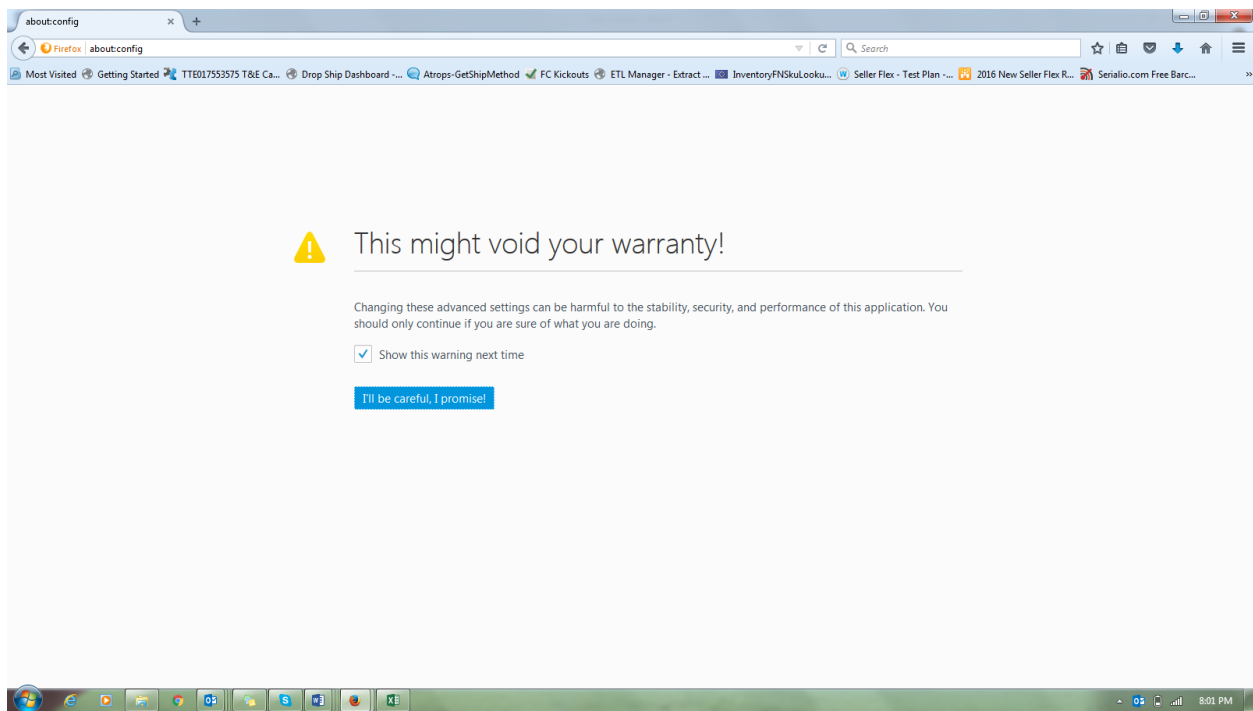

- 1. Download & Install shipping label, gift card & PDF printer on your system.  
Refer to document shared on how to set up your Zebra printers.
- 2. Download & Install Java from java.com.
- 3. Download & Install Firefox.
- 4. Go to start->configure Java -> Security ->Edit Site list-> Add in site list  
<https://dropship.amazon.in/> -> Click OK

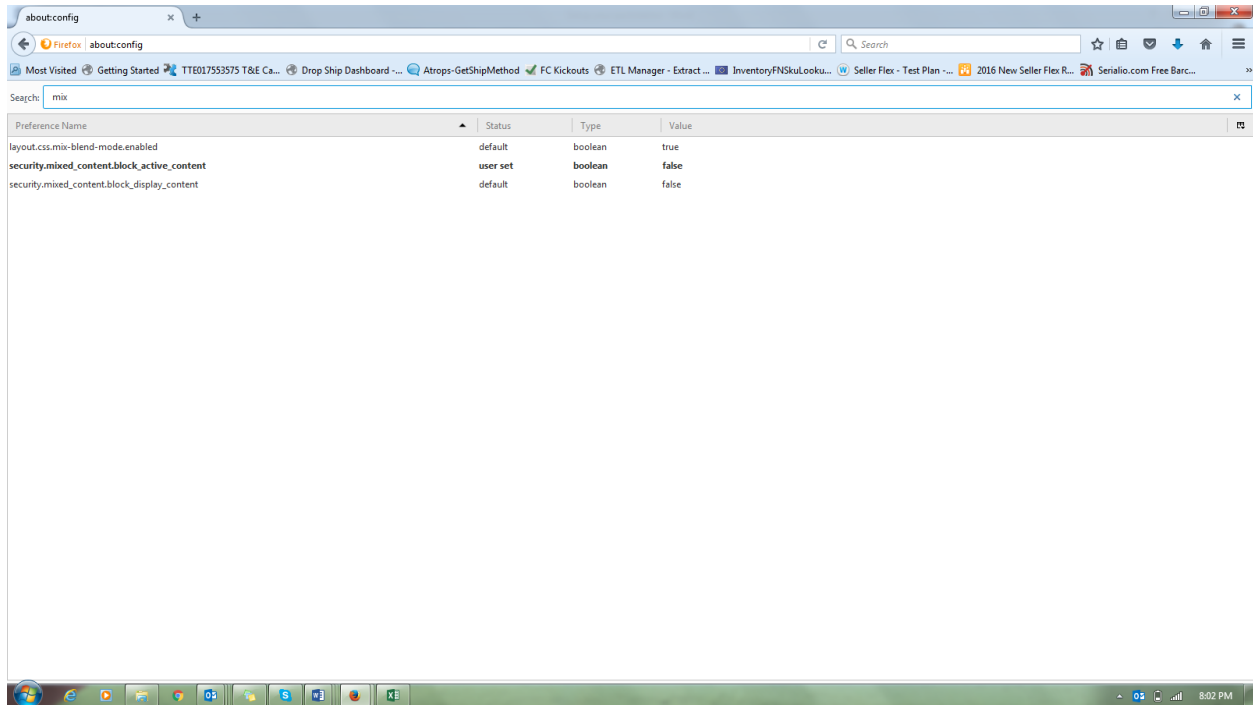

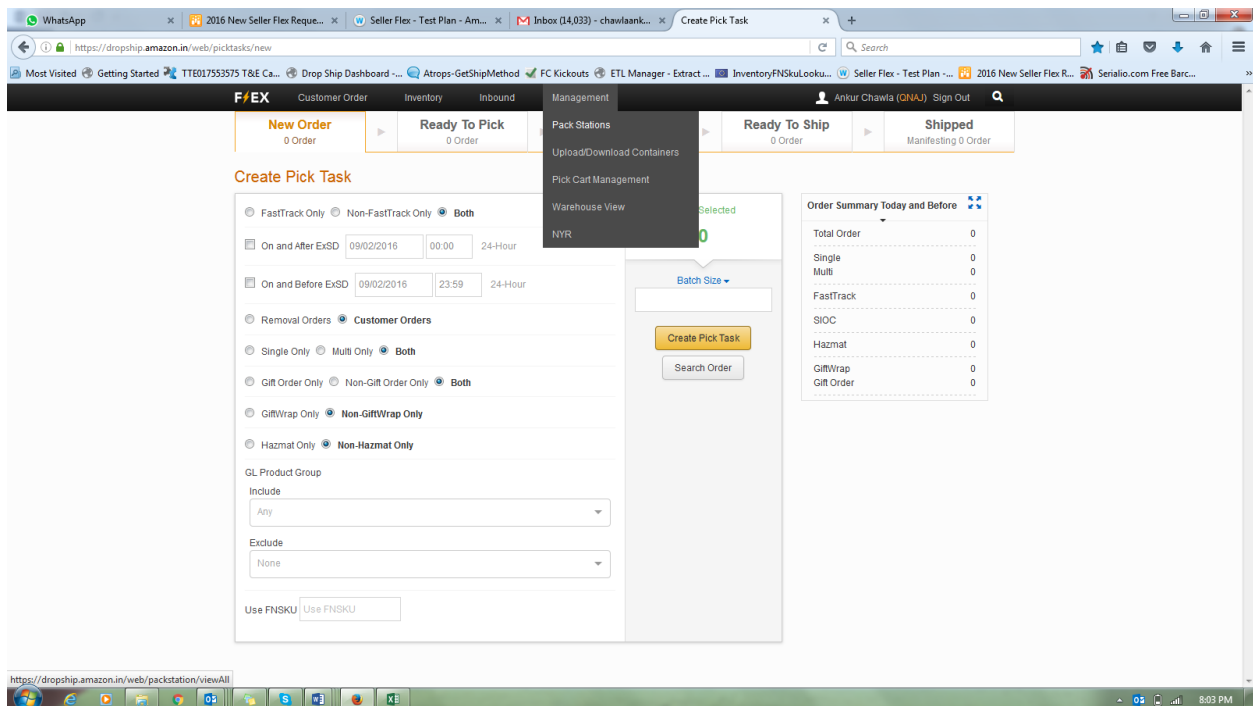

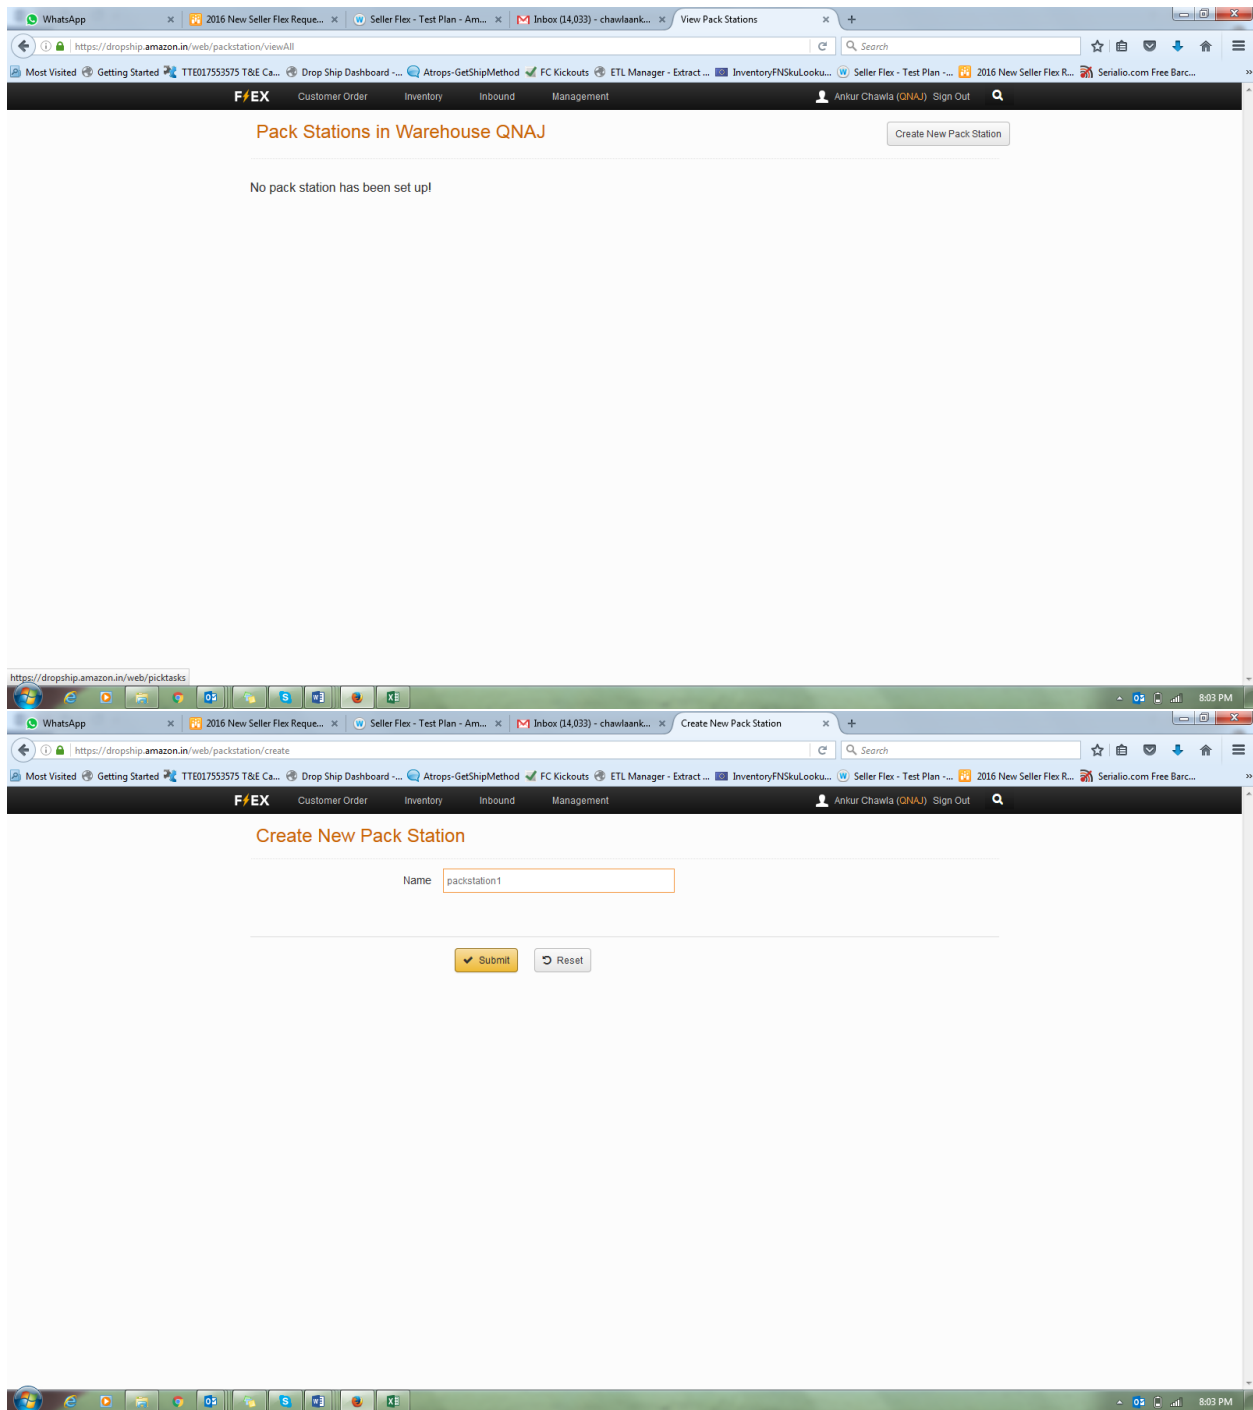

5. Open new tab in Firefox->Write in address tab about:config ->new window will open, click on I will be careful, I promise.
6. In search box write mix -> Make sure last two contents are false.(You can convert from true to false by double clicking on true)

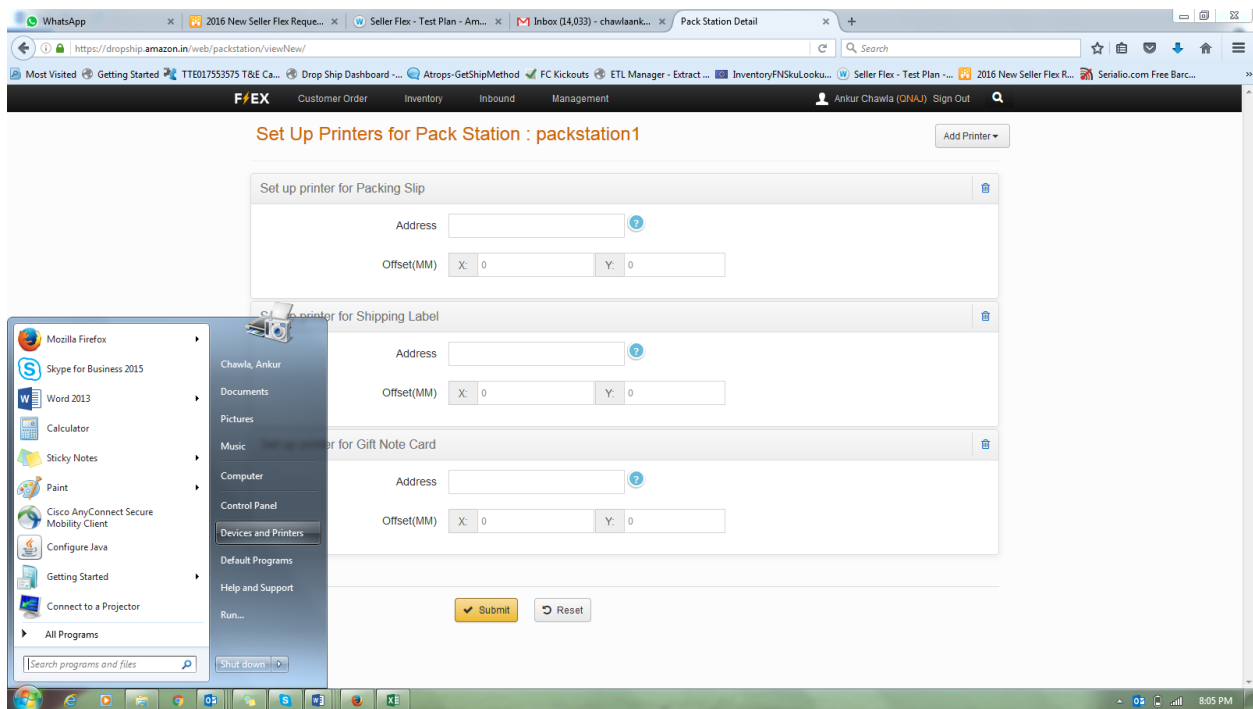

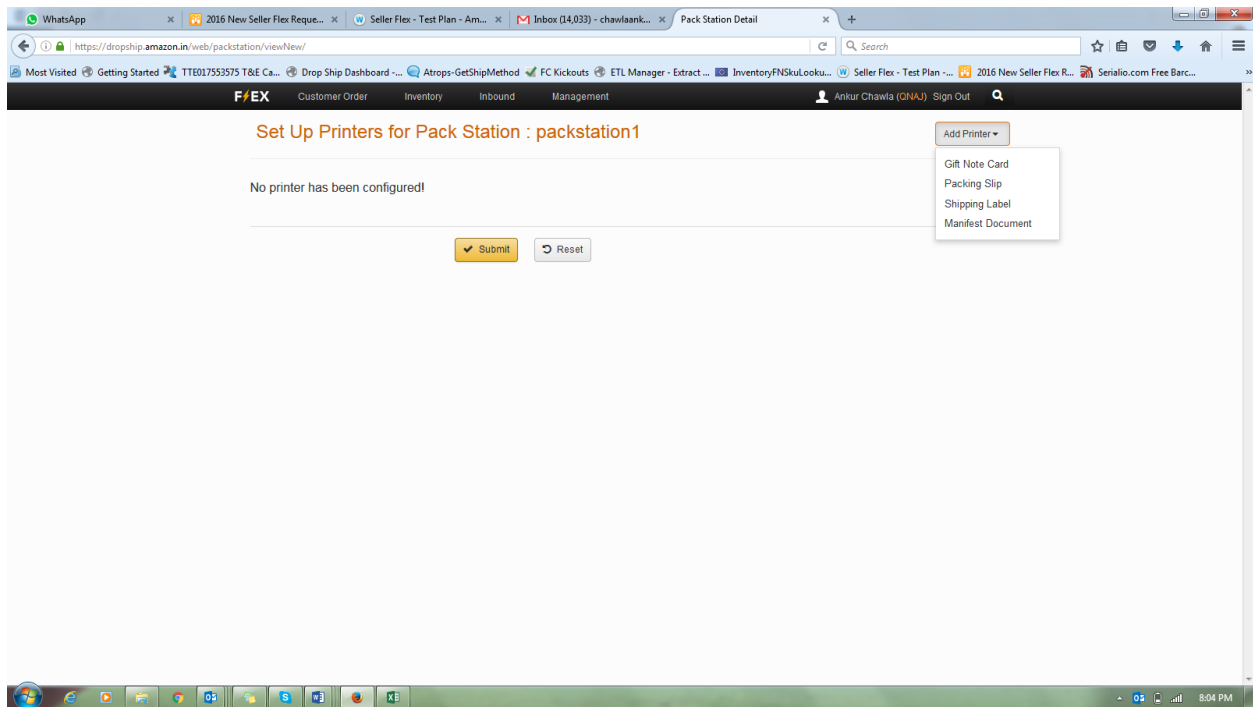

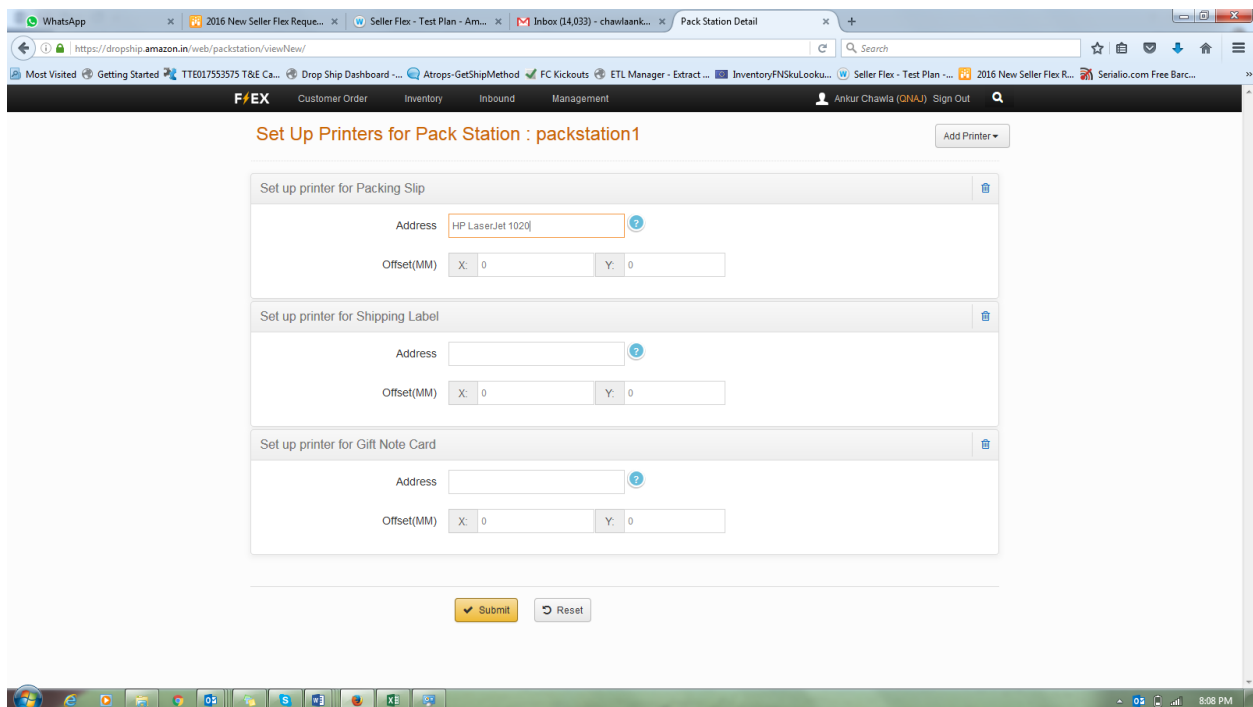

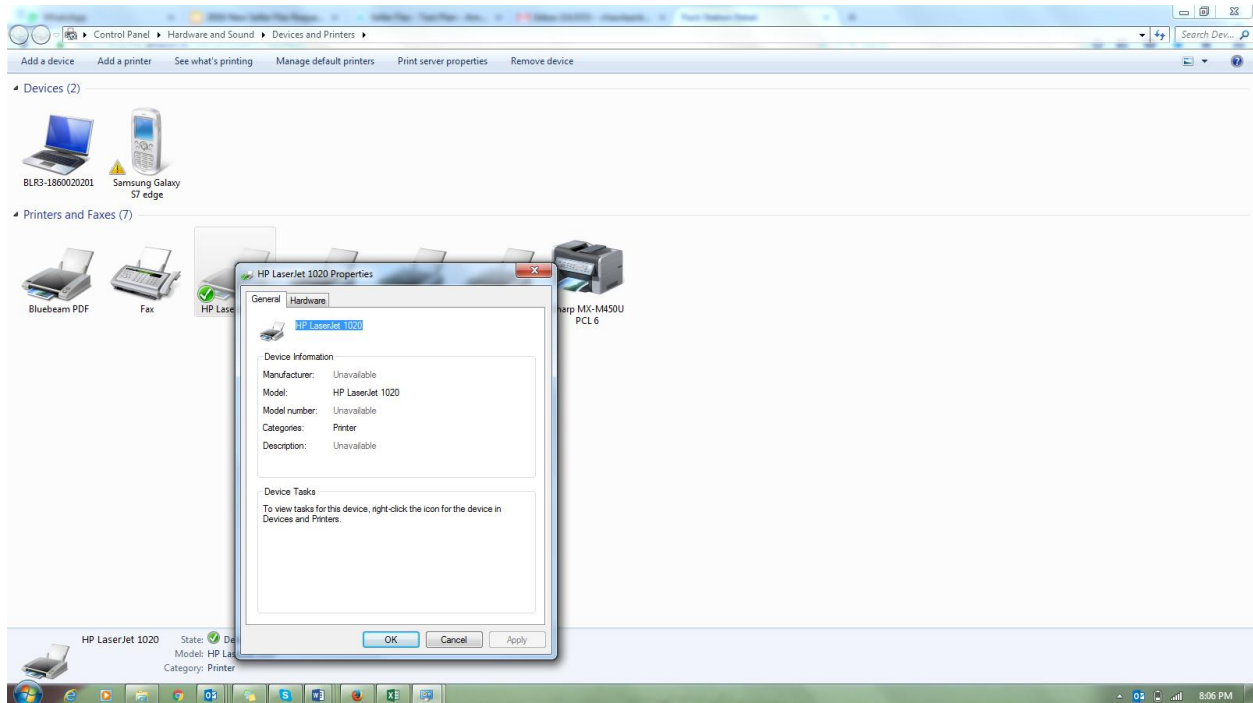

- In dropship -> Go to management tab -> Pack stations->Create new pack station->Add printer by adding name of printer from device and printers in printer properties. Add Shipping label, gift note card and packing slip printer. Don't put anything in offset. After adding all 3 printer name, click on Submit.

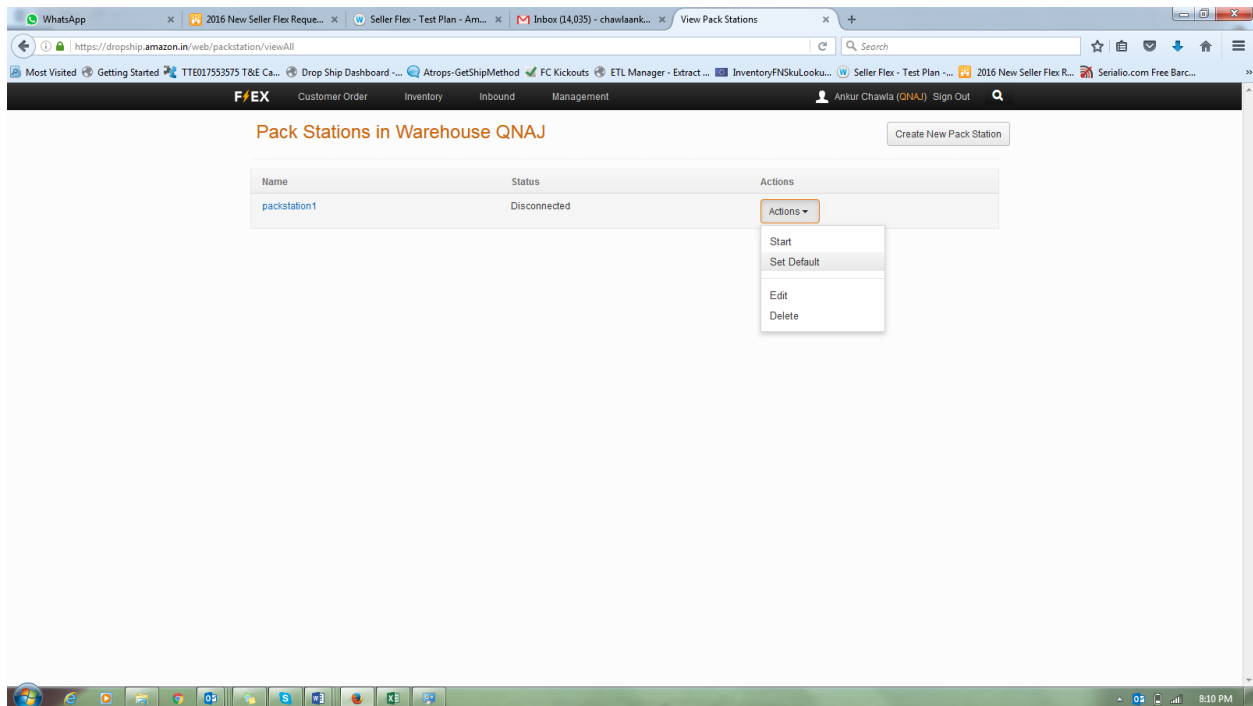

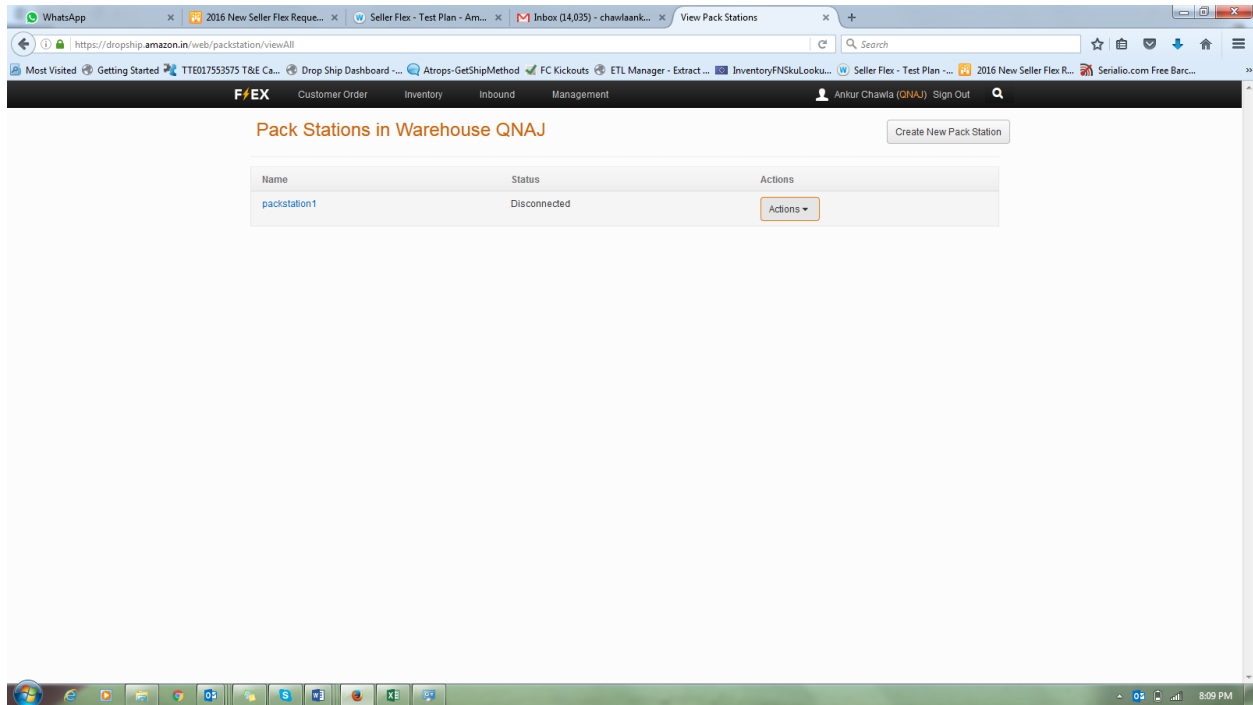

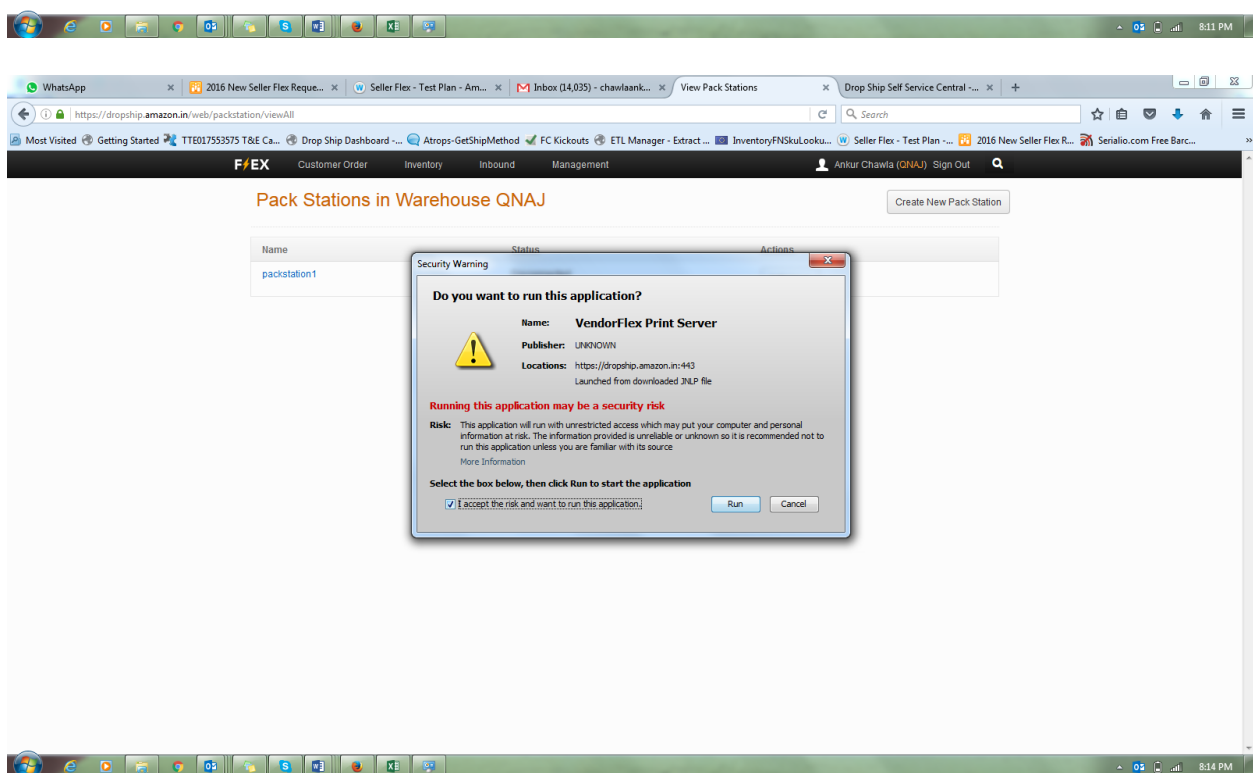

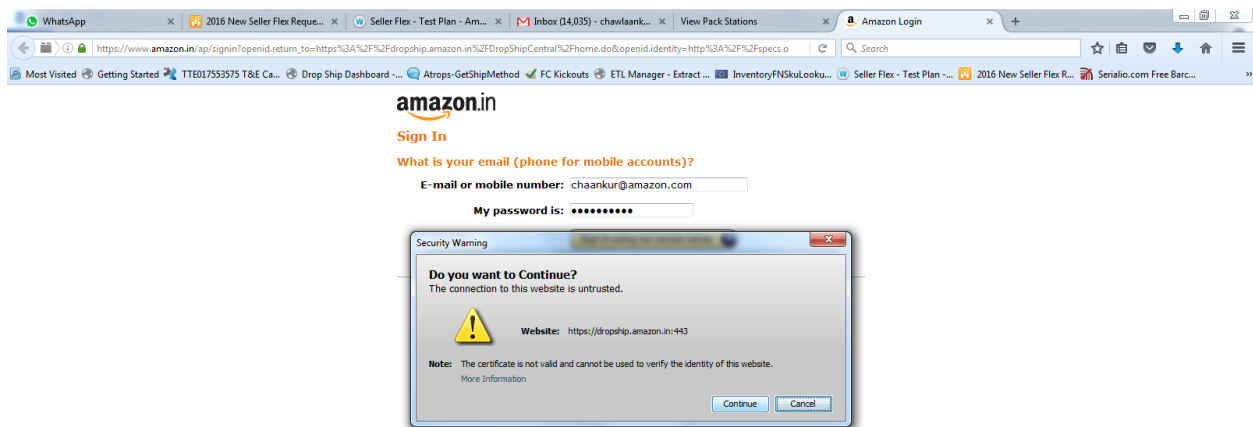

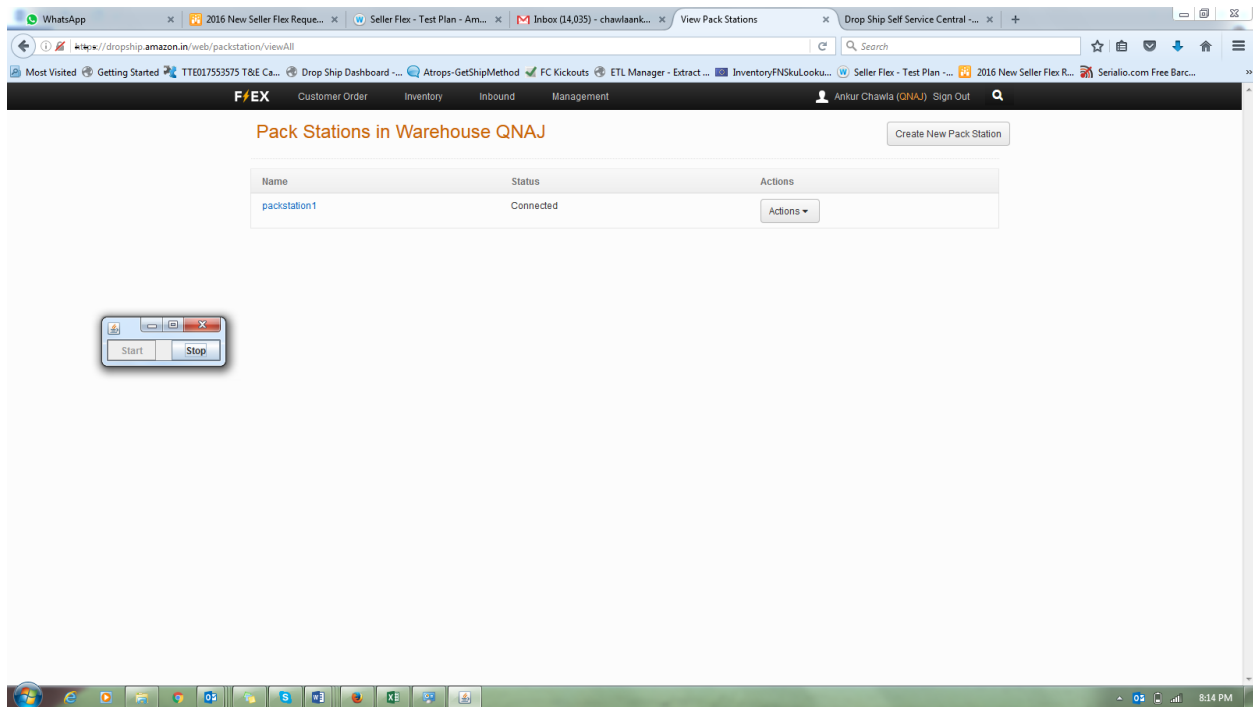

8. Go to actions-> Click set as default->Click start. A new window will open up accept and run it. It will open a java applet with start and stop written, let it run. Don't close the new window only minimize it.

9. In 15 seconds you will see your pack station getting connected.
